

## Human tests on wrinkles

The regenerative cream VITACREME B12 used for these tests was applied daily during 7 weeks, on 100 persons, aged between 20 and 60 years old and over.

### Results of the tests :

#### In 25 % of the cases SPECTACULAR IMPROVEMENT.

Important tightening up of the skin of the neck and of the face oval, reduction of the depth of the wrinkles, softer skin and cheek wrinkles had disappeared.

#### In 40 % of the cases VISIBLE IMPROVEMENT.

Skin with a satisfactory moisture content, the skin is more elastic with a tightening of the tissues of the neck skin.

In 35 % of the cases IMPROVEMENT IN THE MOISTURE LEVEL of the skin and in the elasticity of the tissues.

#### IN CONCLUSION THE RESULTS ARE REMARKABLE.

In all cases the action of VITACREME B12 takes effect very rapidly. The effects are clearly visible after the first week of the treatment. The results are most satisfactory concerning the elasticity of the skin tissues and the skin moisture.

In general the clinical tests confirm a stimulation of the biosynthesis in the connective tissues of the dermis and particularly a stimulating action with a reconstitution of elastin in the intermediate dermo-epidermal zone.
